Examiner's Amendment and Examiner's Statement of Reasons for Allowance

Allowance (9/23/06)

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A - directed towards claims 17-23, 32-26, a door module.

Species B - directed towards claims 24-31, a vehicle door.

- 2. During a telephone conversation with Mr. Anderson 8/21/06 a provisional election was made without traverse to prosecute the invention of Species A, claims 17-23, 32-26. Applicant in replying to this Office action must make affirmation of this election. Claims 24-31 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
- 3. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for the following Examiner's amendment was given in a telephone interview with Mr. Anderson 8/21/06.

The claims were further amended to read as follows:

1-16. (Cancelled)

Art Unit: 3612

Page 3

17. (Amendment) A door module for a vehicle door having a structural shell sealing flange, the door module comprising: an interior trim having at least one projection;

a separating sheet dividing the vehicle door into a dry chamber and a wet chamber;

at least one vehicle component at least partially disposed in the dry chamber and extending through the separating sheet;

wherein a contact pressure zone to seal the dry chamber is provided by one or more projections extending from the interior trim and pressing one or more clips configured to bias the interior trim toward the sealing flange so that the at least one projection presses the separating sheet against the structural shell sealing flange.

Art Unit: 3612

18. (Previously Presented) The door module of claim 17, wherein the interior trim comprises a reinforcing element and the projection extends from either the interior trim or the reinforcing element.

Page 4

- 19. (Previously Presented) The door module of claim 17, wherein the at least one projection comprises a pair of ribs.
- 20. (Previously Presented) The door module of claim 19, further comprising a sealant introduced between the ribs and arranged on the separating sheet.
- 21. (Previously Presented) The door module of claim 20, wherein the sealant comprises a bead of sealant covered with a peel-off protective film before the assembly of the module.
- 22. (Previously Presented) The door module of claim 17, wherein the separating sheet comprises at least one layer of a closed-cell foam.
- 23. (Previously Presented) The door module claim 17, wherein the separating sheet comprises a first layer comprising of an open-cell plastic foam and a second layer of a closed-cell foam.

24-31 cancelled.

Art Unit: 3612

.

Page 5

- 32. (Amendment) A door module for a vehicle door that is divided in a sealed manner into an outer wet door chamber facing a door shell, and an inner dry door chamber facing an interior trim and including mechanical or electrical functional components that are coupled in a preassembled manner on the door module in the dry door chamber and can be mechanically or electrically coupled to door components arranged in the wet door chamber, the a seal between the dry door chamber and the wet door chamber being formed by a separating sheet that is penetrated in a sealed manner by a connector clip for the functional components secured on the door module on the near side of the separating sheet, wherein an interior decorative trim of the door module or a reinforcing element arranged on the interior decorative trim have one or more contact pressure zones that preferably extend about a periphery of the door module and onto which the separating sheet can be is pressed in a sealing manner by contact with at least one projection extending from the interior trim on to the door shell and the clip coupling the interior trim to the door shell.
- 33. (Amendment) The door module of claim 32, wherein the functional components or the connector are at least partly arranged directly on a flat side of the interior decorative trim of the door module that is facing the dry chamber.

Art Unit: 3612

- 34. (Amendment) The door module of claim 33, wherein the functional components or the connector are at least partly arranged on the <u>a</u> reinforcing element that is coupled to the interior decorative trim of the door module.
- 35 (Previously Presented) The door module of claim 32, wherein the door module is engaged in a latching manner with the door shell in a direction perpendicular to the door shell while forming the mechanical or electrical coupling between the functional components and the door components.
- 36 (Previously Presented) The door module claim 32, wherein the separating sheet is preassembled on the door module which is then coupled to the door shell.
- 37. (New) The door module claim 17, further comprising at least one vehicle component at least partially disposed in the dry chamber and extending through the separating sheet.
- 4. The following is an Examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims in this case, is the inclusion of the limitation "an interior trim having at least one projection; a separating sheet dividing the vehicle door into a dry chamber and a wet chamber; one or more clips configured to bias the interior trim toward the sealing flange so that the at least one projection presses the separating sheet against the sealing

Application/Control Number: 10/537,629 Page 7

flange" in the independent claim, in combination with the other recited limitations in claims supported by this application, which are not found in the prior art of record.

- 5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 6. Any inquiry concerning this communication or earlier communications should be directed to Primary Examiner Kiran B. Patel whose telephone number is 571-272-6665. The examiner can normally be reached on M-F from 8:00 to 5:00. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
